

Woodville

Whimsy from Wood - Strength from Steel

Woodville

Woodville combines the natural character, the warm feel and the pleasant scent of wood with the durability, stability and resilience of metal.

A fairy-tale world emerges between slanted, wooden houses with sloping roofs that either stand tightly packed or are connected by rope nets and bridges. Reality and fantasy merge here. You can find the climbing realm of bandits, witches and goblins between the oversized windows and frazzled, boarded walls.

Woodville contains wooden cottages (shacks) resting on posts, which are characterized by a construction that appears to be skewed and random. The design invokes a feeling of an adventure playground and an individual custom-construction. This character is emphasized by the odd windows and doorframes, the slanted roof tiles, the tilted base and the boards of varying lengths along the walls.

The cottages are available in 2 different landing heights– Shack1 and Shack2.

Woodville Combi.03

90.224.100.3

(m) 5,3 x 11,4 x 4,0
 (") 17-4 x 37-6 x 13-0

EN 1176 (m) 15,4 x 8,3
 ASTM/CSA (m) 15,3 x 9,0
 ASTM/CSA (") 50-1 x 29-4

(m) 1,9
 (") 6-3

5-12

This is a large combination of Shack1 and Shack2. Two neighboring huts share one post. A third hut is connected via a catwalk bridge. Two slides and various added elements as well as, different landing heights ensure a multi-faceted climbing landscape.

Woodville Combi.02

90.224.100.2

 (m) ("'-")	5,9 x 6,0 x 4,0 19-3 x 19-8 x 13-0
 EN 1176 (m) ASTM/CSA (m) ASTM/CSA ("'-")	9,0 x 8,9 9,9 x 9,6 32-3 x 31-4
 (m) ("'-")	1,9 6-3
	5-12

The Woodville Combi.02 combines 2 huts of different heights, which share a common support post. The larger of the two huts is equipped with a connecting mesh net, which is combined with an entry net, and thus offers an exciting challenge. The two huts are connected by a balcony which can be climbed via a rope ladder or using the rocking-plate ascent.

Woodville Combi.01

90.224.100.1

(m) 3,6 x 6,0 x 4,0
 ("'-") 11-11 x 19-8 x 13-0

EN 1176 (m) 9,0 x 6,8
 ASTM/CSA(m) 9,9 x 7,3
 ASTM/CSA ("'-") 32-3 x 24-0

(m) 1,9
 ("'-") 6-3

5-12

This combination of shacks, which are connected by a support post, has an entrance in the shape of a triangular balcony. A rope ladder, rocking-plate ascent, climbing rope and entry net ensures a variety of climbing options, before you swiftly slide back down the slide.

Shack1.01

90.224.010.1

	(m)	5,0 x 2,0 x 3,7
	("-")	16-4 x 6-8 x 12-4

	EN 1176 (m)	8,5 x 5,1
	ASTM/CSA(m)	8,7 x 5,7
	ASTM/CSA ("-")	28-5 x 18-8

	(m)	1,5
	("-")	6-0

	5-12
--	------

Shack1 with a landing height of approximately 5' is the smaller one of the two play huts. In this variation, the "witch's house" distinguishes itself through its high transparency. The two different entrances can be climbed into using the slanted net ascent, as well as a climbing rope with rubber cylinders which function as a climbing support. A special feature of Shack1 are the posts that are slanted outwards.

Shack2.01

90.224.020.1

	(m)	3,4 x 6,8 x 4,0
	("-")	11-1 x 22-5 x 13-0

	EN 1176 (m)	9,9 x 6,7
	ASTM/CSA(m)	10,7 x 7,2
	ASTM/CSA ("-")	35-12 x 23-8

	(m)	1,9
	("-")	6-3

	5-12
--	------

Shack2 with its landing height of 6'-3" is the larger one of the two systems. In this variant, the posts are slanted inward. Using the entry net or the rope ladder to reach the playhouse, the peak of the Shack2.01 reaches nearly 7 feet. A sweeping curved slide brings you back to the ground.

This is Woodville

In contrast to typical wooden playground units, Woodville distinguishes itself through its individual design and its durability. This is especially achieved through the use of high-quality materials and their high-grade finish.

The wood
Wood invites through its warm surface feel, a natural character and a pleasant scent. All wooden posts are made from laminated timber. The boards are made from black locust. The materials are high quality for the sustainability and durability of this wooden playground unit.

The Terranos clamp
The Terranos clamp made from aluminium guarantees a long-lasting and secure fastening of other play elements of Berliner, as well as the possibility to adjust the heights.

The roof
The HDPE tent-roof made from weatherproof boards, provides a realistic shed character. In addition, it constructively protects the wooden components that are located under the roof from weather effects. The roof is available in all the colors of our HDPE-color palette.

The windows
The crooked windows present a real eye-catcher. Oversized openings framed in white are a striking property of the shacks. At the same time, the large windows provide a high level of transparency.

The balls
The system balls made from aluminium, are a tried-and-tested connection element of Berliner. They act as an elegant connection between the steel and wooden posts. This construction method prevents the direct contact of the wood with the ground, and thereby protects the posts from rot due to moisture. Therefore, an extra post with built-in steel anchors is not needed.

The posts
The bottom part of the post is made of steel. As a standard coating, a two-ply solvent-free epoxide-polyester coating is applied, which makes the steel corrosion resistant. Due to the huge selection of available RAL colors, individual customer desires can be fulfilled. The steel posts offer a maximum amount of modularity – whether bridges or nets – diverse elements or other products of Berliner can easily be connected to the Terranos system components.

Combination options and add-ons

The shacks are available with different add-ons and in various combinations, as is typical with Berliner. Due to the mirrored inclination, the higher and lower houses can share a post and thereby form a combination. In doing so, you have the choice of a triangular or rectangular balcony between the huts. Choose amongst our wide pallet of entry options and bridges, and build your own climbing landscape with Woodville.

Entry net
The entry net offers an exciting challenge for little elves and magicians.

Catwalk bridge
The classic, wobbly connection element permits the most secure crossing from rung to rung.

Crossing net
The crossing net requires the highest amount of focus from the climbing goblins. You only make it across if you carefully step onto the rope.

Rocking plates
The new rocking plates at varying heights offer a thrilling alternative to master the ascent and descent.

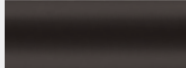

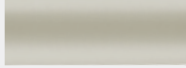

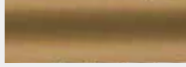

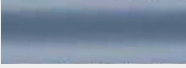

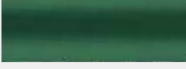

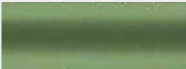

Climbing rope
The climbing rope poses a challenge even for advanced climbers.

Rope ladder
The rope ladder offers a wobbly ascent into the weather hut.

Ropes and Tubes

Basic Colors of ropes	Design Colors of tubes and posts (matte finish)	Colors of HDPE-panels
 Red	 RAL 9017 Traffic black	 Red
 Blue	 RAL 9010 Pure white	 Black
 Black	 RAL 9007 Grey aluminium	 Blue

 Green	 RAL 8001 Ochre brown	 Yellow
 Orange	 RAL 8012 Red brown	 White
 Silver	 RAL 3012 Beige red	 Lilac
 Beige	 RAL 3002 Carmine red	 Orange
 Dark Green	 RAL 2009 Traffic orange	
	 RAL 4005 Blue lilac	
		 RAL 3015 Light pink
		 RAL 5024 Pastel blue
		 RAL 5012 Light blue
		 RAL 5017 Traffic blue
		 RAL 5021 Water blue
		 RAL 6028 Pine green
		 RAL 6034 Pastel turquoise
		 RAL 6021 Pale green
		 RAL 1028 Melon yellow

You will find even more colors for ropes, tubes and posts in our current catalog or on request.

Black locust

Black locust originates from eastern North America. In the 17th century, it was introduced to Europe and has since spread throughout central and southern Europe. Thanks to its durability and consequential resistance to insect and fungal attacks, black locust is ideally suited for playground facilities. A further advantage of this building material is its CO2 neutrality.
