DNA Towers

Available in different sizes, the DNA Towers consist of graceful towers containing three-dimensional climbing nets stretched inside external steel skeletons. A careful combination of curved and straight metal tubing results in a spiral resembling the structure of DNA. This impression is further enhanced by chosen

color schemes, as well as the use of differing thicknesses of tubing. The DNA Towers have been deliberately designed to give an open and unencumbered feel. Depending on the height of the tower in question, narrow mesh netting provides the necessary safety. This results in a near see-through design.

DNA Tower XL.04 raises the twirling towers of the DNA family to unparalleled heights. With a diameter of 13 ft and a height of 31 ft, a sensational play space of 2,871 ft³ is thereby created, offering children even more room for climbing fun within a three-dimensional net environment. The tower's uncluttered design language, together with the see-through nature of its facade, ensure that DNA Tower XL.04 compromises nothing in elegance, despite its great size.

DNA Tower XL.03

90.295.025

(m) 4,0 x 4,0 x 7,6
 ("") 13-1 x 13-1 x 24-11

Up the spatial net goes, rising through three levels, before it reaches a height of almost 25 feet off the ground. Along the way, DNA Tower XL.03's voluminous, three-dimensional net offers any number of ways for children to reach the top, as well as allowing plenty of room for them to develop their own play ideas.

5-12

Incorporating a climbing net of more than 640 ft², this smallest in the new line of climbing towers offers considerable play volume which many children can climb about in. At the same time, thanks to the open and accessible nature of its design, it's almost see through in appearance. Ideal for playgrounds!

DNA Tower L.03

90.295.013

Children can climb up more than 13' high inside this net. Whether it's fancied to be a lookout post or a rocket, not only does this three-story rope play tower offer plenty of room for children to climb around in, it spurs their imaginations, too!

DNA Tower L.04

90.295.014

(m) 3,1 x 3,1 x 7,2
(ft) 10-1 x 10-1 x 23-7

The DNA Tower L.04 offers the possibility for children to climb about 20' into the air within the three-dimensional netting! This calls for courage, concentration and ambition in equal measure.

As if all this were not enough, this graceful tower provides huge play volume on a small playground footprint.

From a tree house Trii2, the path across a suspension bridge leads directly into the second story of DNA Tower L.04. Anyone making it to the very top of the netting is confronted by a steep descent, but the curving tunnel slide offers a quick exit.
