Berliner
Play equipment for life

Magical, twisted, crazy

Welcome to the realm of imagination!

Triitopia is the newest innovation of the successful Berliner Greenville series and combines award winning design with tried and tested materials in a spectacular way! A magical world of climbing and adventure where reality and fiction blend together and evolve into the unpredictable interplay of transparent and closed façade elements that are combined in close knit, nestled and asymmetric ways. Diverse net pieces invite you to climb, and lead to numerous corners and angles, and up to viewing areas and slides on different levels. Whether a magic school, bandit's tower or knight's castle, anything is possible here!

The chaos has a system!

Behind the seemingly random construction, lies a highly modular system that allows every Triitopia structure to be custom designed in a shape and size to a maximal extent. To do so, choose from a wide range of different net elements, panel types and slide options, and let your custom adventure world become a reality with us. It goes without saying that Triitopia can be combined with nearly all other Berliner play equipment.

Kids will fully enjoy the slightly smaller adventure world. Children that ascend through the spatial net to the very top can swiftly descend the tunnel slide all the way to the ground. Alternatively, the new net tunnel on the facade can be used as an ascent or descent option.
