Little Big Ben.2.2

Urban Design Playpoints are climbers or rockers or twisters. They are Playpoints first and foremost, but they are also very nice pieces of public design, and they are sculptural. All URBAN DESIGN Playpoints are high-end engineered units made from high-quality materials like stainless steel with a brushed finish, powder coated recycled aluminum connectors, high density polyethylene (HDPE)

panels and ITR-bearings for maximum safety and durability.

A ride on the Little Big Ben is a great experience, as the speed of spinning depends on how its users work together – every ride is a unique adventure.

Technical Data

Technical changes are reserved. The following text can also be used for tenders.

Turntable:

The stainless steel plate with a diameter of Ø 4'-1" is covered with HDPE plates and surrounded by a welded stainless steel tube with a diameter of Ø 2 3/8".

Tubes and Balls:

The bent stainless steel tubes with a diameter of Ø 2 3/8" are connected to a Frameworkx® aluminum ball with a diameter of Ø 7 7/8", that is sandblasted, powder-coated without solvents and securely closed with a durable EPDM cap.

Stand:

The fully integrated bearing unit forms a self-contained system and is therefore particularly insensitive to weather influences and requires little maintenance.

Covering:

The non-skid HDPE plates with a thickness of 3/4" are screwed flat on the turntable.
