Bouncers.02 Product Specification

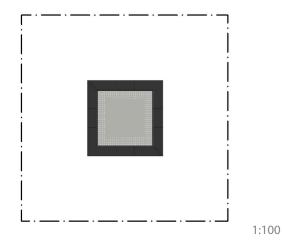

Play, sports, learning and therapy are just a few keywords that belong to trampolines. With growing popularity, they are hardly thinkable off the playground. The devices are characterised by a joint-gentle jump, as well as a pleasant fall and landing behavior. They are optimally tailored to the body of adolescent children. The Kids Bouncees trampolines are available in different sizes. Round, square and rectangular shapes – there will be something for every design concept.
