Quadrifol.06 Product Specifications

Published: January 2020

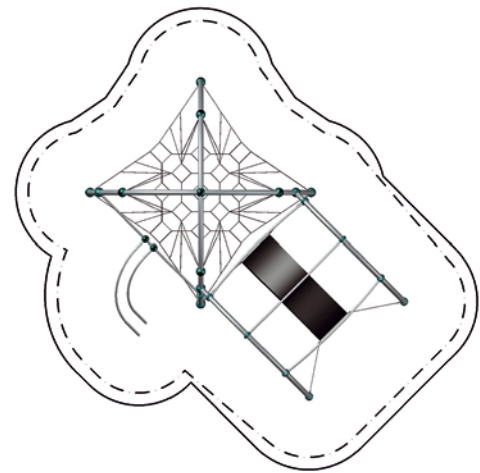

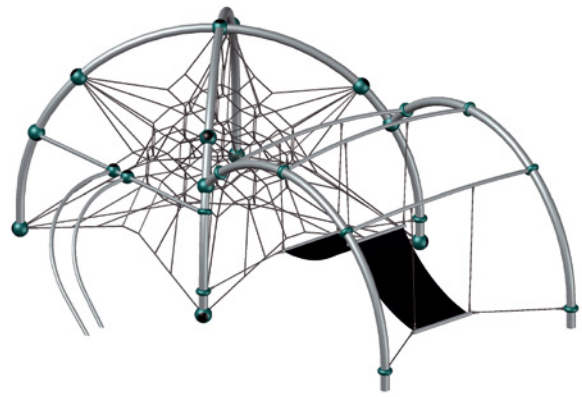

Quadrifol.06

Univers showcases all see-through outer frame structures with three-dimensional nets inside. All tensioning points are provided with the patented AstemTT® tensioning system. This ensures that no technical connecting elements or rope loops are located in the play area.

With the Quadrifol.06 you can climb up to the spatial net via the Wobble Way, but the rubber mat is also suitable for relaxing. In addition, a curved banister ensures a quick way back down.

71.133.006

 Product Family	Univers
 Length x Width x Height (m) Length x Width x Height ("")	8,6 x 8,6 x 3,5 28-0 x 28-0 x 11-4
 Protective Surfacing Area acc. to DIN EN 1176 (m) Protective Surfacing Area acc. to ASTM/CSA (m) Protective Surfacing Area acc. to ASTM/CSA ("")	11,6 x 11,6 12,2 x 12,2 40-0 x 40-0
 Fall Height acc. to EN 1176 (m) Fall Height acc. to ASTM/CSA ("")	1,56 6-0
 Age	5-12
 Minimum Space required acc. to DIN EN 1176 (m ²) Minimum Space required acc. to ASTM 1487 (ft ²)	81.3 998.5
 Number of Foundations	7
 Concrete Volume C20/C25 (ft ³)	307.3
 Number of skilled Installers required	2-3
 Installation Time without Foundation	16 hours
 Dimensions of largest Part ("")	Ø 5 ¼" x 22'-11 ⅞"
 Weight of heaviest Part (lbs)	352
 Shipping Volume (ft ³)	On request
 Total Weight (lbs)	On request
 Spare Part Guarantee	Lifelong

Technical Data

The following text can also be used for tenders.

Posts:

The bent steel posts with a diameter of Ø 5 ¼" are thermally galvanized to protect against corrosion or, if desired, can be powder-coated in color using a solvent-free epoxy/ polyester/ process.

Balls:

The Frameworx® aluminum balls with a diameter of Ø 9 ⅜" are sandblasted and powder-coated solvent-free to protect against corrosion. In addition, they are equipped with the internal, patented AstemTT® tensioning system and securely closed with durable EPDM caps.

Tubes:

The Steel tubes with a diameter of Ø 2 ⅜" and a wall thickness of ⅛" and ⅜" are thermally galvanized to protect against corrosion and powder-coated in color using a solvent-free epoxy/polyester/process.

Terranos Clamps:

The two-part Terranos® aluminum clamps are partly used to connect the ropes and tubes to the steel posts by using the Frox-Connection. When connecting stainless steel chains and steel posts, the clamps with Chrox-Connection are used.

Curved Banister:

The curved Frameworx® stainless steel tubes with a diameter of Ø 2 ⅜" and a wall thickness of ⅛" are connected to the main frame by aluminum balls with a diameter of Ø 7 ⅞".

Ropes:

The U-Rope® with strand cores and rope core made of galvanized wires has outer strands which are covered with highly abrasion-resistant and highly UV-resistant polyester yarn (not polypropylene). The rope diameter is Ø 1 ⅞".

Spatial Net:

The rope crossing points of the spatial net are localized by durable, forged aluminum cloverleaf rings (no plastic). Spatial nets are low in follow-up costs due to individually replaceable rope strands.

Rubber Mat:

The rubber mat of the Wobble Way consists of durable and vandalism-proof conveyor belt.
