Play equipment for life

Great Play for small Children: **Wonderwalls**

Wonderwalls is the latest innovation in play equipment for toddlers by Berliner. Fitted with a wealth of play functions in a reduced space Wonderwalls are specifically aimed at the needs of toddlers and pre-school children. Each equipment design offers a number of play worlds that are interconnected by windows and passages between the three or respectively four walls, which are fanned out around a central post. As well as space for retreat, children are encouraged to engage in role-playing games using elements such as mud tables, benches, sand workshops or openings in the walls. Language and social skills are fostered and trained in a playful way.

The colourful design and the choice of natural motifs such as a mushroom, pumpkin or tree stump appeal to toddlers and create an inspiring environment.

Thanks to the modular system, low rope elements can be connected directly to the walls. Children can garner their first experiences in balancing, or crawling on wobbly surfaces, which play an important role in developing a sense of balance.

The use of various particularly robust materials such as HDPE, steel, aluminum, rubber membranes or rope not only ensures the longest possible lifetime of the equipment, but also offers a wide range of changing surfaces to explore different sensory experiences. Children thus learn to perceive their environment more consciously.

Wonderwalls.01 offers among other features:

Rubber Membrane Curtain
A curtain made of rubber membranes makes going through it a sensory experience.

Puzzle Elements
Sliding the elements creates different animal and colour combinations, depending on which side of the wall the child is.

Mud Tables
Mud tables at different heights encourage role playing.

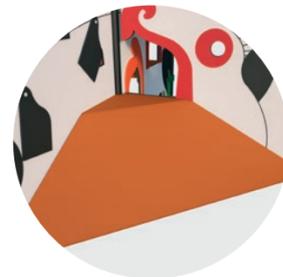

Rotating Disc
By turning the disc, different motifs come to light.

Wonderwalls.02 offers among other features:

Revolving Flaps
Peepholes and motifs are hidden behind the revolving flaps.

Ramp
This offers an attractive challenge for toddlers who are learning to walk.

Sand Slide
The sand slide makes gravity perceptible.

Sand Crane
Children can shift the sand from one table to another.

Playing in the undergrowth! The world of hedgehogs, mice and beetles starts here. The highlight of these Wonderwalls in the design of a tree stump is a passage with rubber membranes connecting two play areas. And anyone looking closely will find a secret opening under the bench. Do you dare crawl through it?

Wonderwalls.02

90.295.700.2

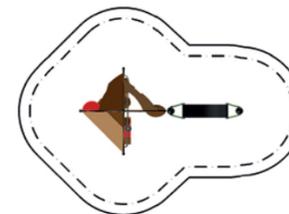

(m) 5,0 x 2,7 x 1,6
(") 16-5 x 8-11 x 5-0

EN 1176 (m) 8,0 x 5,7
ASTM/CSA (m) 8,7 x 6,4
ASTM/CSA (") 28-5 x 20-11

EN 1176 (m) 0,50
ASTM/CSA (") 5-0

3

Playing under the mushroom! Toddlers can immerse themselves in the world of wonders and fables, like pixies. Play elements such as mud tables, hatches in the walls and a sand workshop encourage role play. A hammock made of rubber mats encourages the youngsters to swing or try their first walking and crawling experiences on shaky ground.
