

Lunia

The inner Play Values count, too!

A young child with blonde hair, wearing an orange long-sleeved shirt and blue jeans, is climbing a large, complex rope net structure. The child is smiling and looking towards the camera. The structure is made of thick brown ropes and metal hardware, with a large black and white geometric shape integrated into the design. A safety net is visible in the background.

**Large
spatial net
inside!**

Boundless and reaching high Lunia

Big dreams, big freedom – our new Lunia makes climbing wishes come true. It is available in two different sizes, when it comes to the spheres volume. The spatial net inside can be reached via different ascent possibilities, such as Climbing Plates or Rope Ladders. For even more fun in the three-dimensional climbing net, Flubber or Pendulum Seats can be added. Despite the large play volume, the play structure has a small footprint.

The textile membrane is dirt-repellent, 100 % recyclable and resistant to UV light. In addition, it protects the little climbers from the sun. Lunia can be used as a hot air balloon with basket or without a basket with the design of your choice. The play equipment is also surrounded by a safety grid under the balloon cover.

Inspirations for individual Lunia Designs:

Whether it's a globe, a baseball or the logo of your sports club – the membrane is customizable.

Lunia L

90.137.001

(m)

5,7 × 5,7 × 10,0

('-")

18-6 × 18-6 × 32-9

EN 1176 (m)

An ascent via rope ladders and climbing ropes leads into the gondola of the balloon. From there, you climb over flubber into the inside of Lunia M. The spatial net takes you up to a height of just under 30 foot.
